

MANAGEMENT OF WASTE AT HOME

Garbage and dirty water around the houses spread infection and can cause illness. Proper management and disposal of waste at home, therefore, is very important.

HOW TO MANAGE WASTE AT HOME?

- ✓ Keep the dustbin and throw waste in the dustbin only
- ✓ Keep wet and dry wastes separately
- ✓ Disposed off the waste carefully
 - EITHER throw at a common garbage disposal area
 - OR give it to the garbage collectors

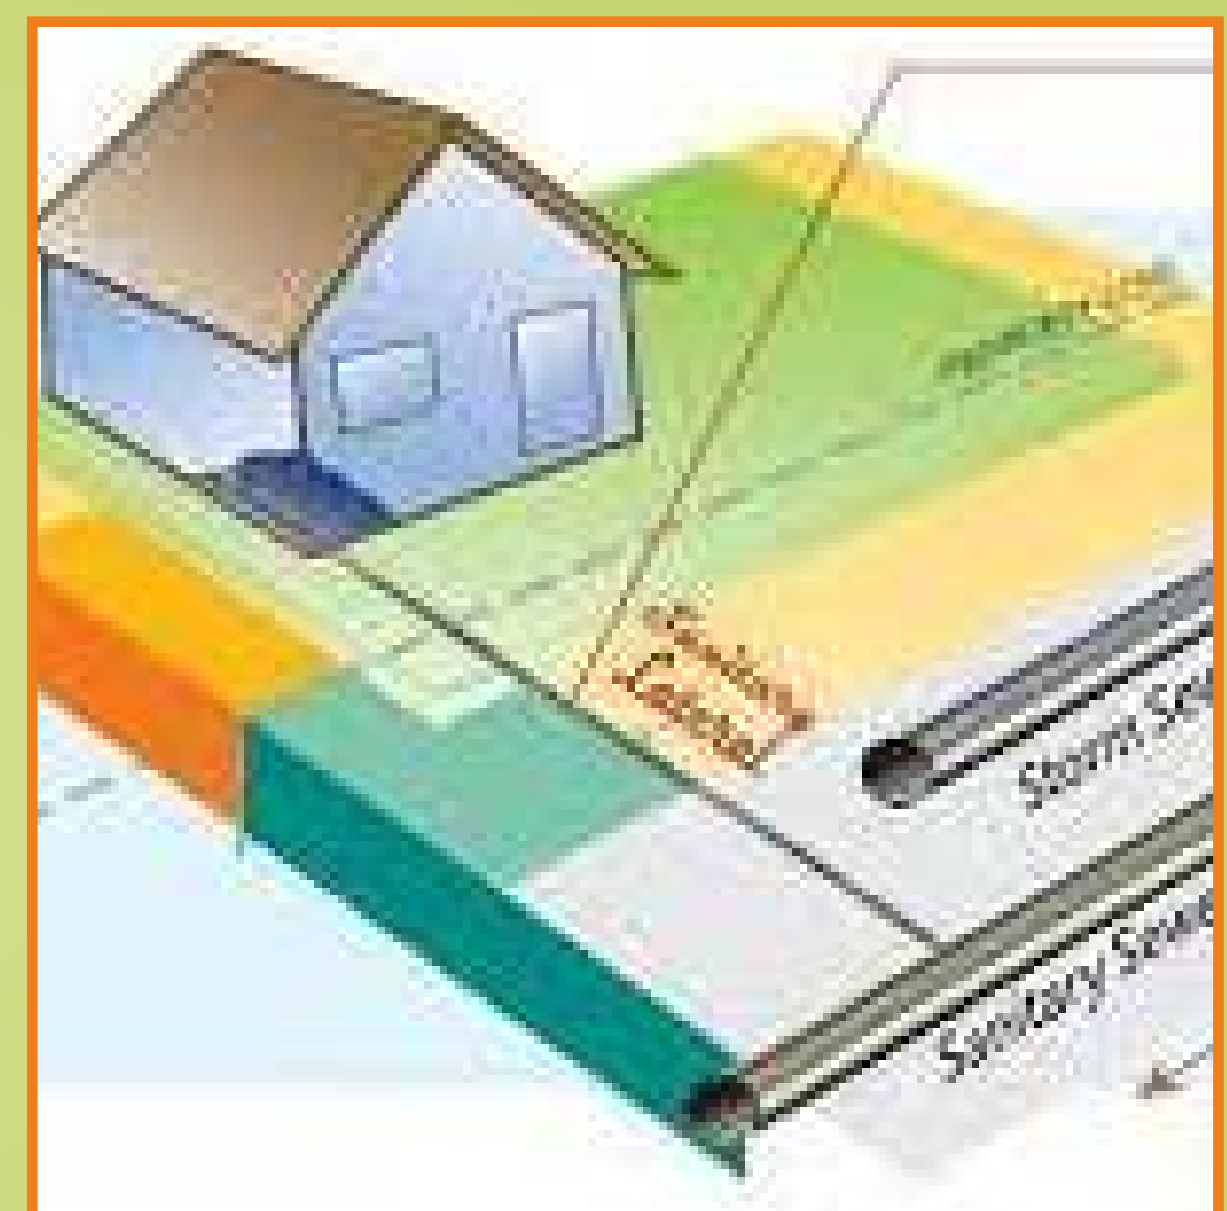

HOW TO MANAGE WASTE WATER?

Channelize household waste water into kitchen garden

Make soak pits at home for other dirty water

Connect household drainage channel to the main community/village drain

It is important to reduce, reuse and recycle waste as much as possible.
